FOR OVER  
**35 YEARS**  
THE **MOST TRUSTED** CROSSBOW  
ON THE PLANET

At Excalibur, we aren't big business cashing in on the growth of crossbow hunting. After 35 years of making crossbows, we are still crossbow hunters who build crossbows for hunters. Our aim is to continue to make the most efficient, reliable and accurate hunting crossbows money can buy, right here in North America, as well as provide unparalleled service to all our customers. All of our products are developed and produced by the toughest, most uncompromising product evaluators in the woods ...US!

Excalibur crossbows are world renowned for rugged reliability. This reputation is primarily due to our Compact Recurve Limb Technology. Excalibur has taken a historical tried-and-true design and perfected it to be stronger, faster, lighter and quieter using modern day components and technology. It's simple – two bombproof limbs and a string. No cams equal no timing and tuning issues. Fewer parts mean less problems.

To prove just how tough Excalibur Crossbows are, we put them through the destruction challenge to see if they would still perform – We drove over it with a truck, we dragged it down a runway, we even dropped it out of a helicopter - the results: perfect bullseyes every time !
